EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Nicholas Gallo, Attorney of Record, on September 29, 2005.

The application has been amended as follows:

In the Specification:

On page 5, line 18, after "Corporation.", the following has been inserted:

-- That is, the absorption elements 18 can be formed of at least one of the group consisting of carbon steel, stainless steel, and nickel-chromium-iron alloys. --

The above change to the specification has been made to provide explicit antecedent basis for the claim limitations in original claim 7.

Examiner's Comments

Applicants' argument (page 8, second paragraph of the response filed September 22, 2005) that the features claimed in claims 8 and 25 of the cap element being thicker than the base

Art Unit: 3745

is illustrated in figures 1 and 3 is persuasive. Therefore the objection to the drawings as not showing these features is withdrawn. Applicants' arguments (page 8, third paragraph of the response filed September 22, 2005) that the specification is clear in the portion which states that the cap of each absorption element can extend circumferentially to at least overlap the first end of the cap of an adjacent one of the absorption elements are persuasive. The objection to the specification as being unclear for this reason is withdrawn. Applicants' argument (page 10, first paragraph of the response filed September 22, 2005) that claim 17 as amended is definite is persuasive.
